

Triessent[®]* Specialty Pharmacy Drug[†] List - Medical

Definition of Specialty Drugs

Specialty medications are generally prescribed for people with complex or ongoing medical conditions such as multiple sclerosis, hemophilia, hepatitis C and rheumatoid arthritis. Typically, these high cost medications also have one or more of the following characteristics:

- Injected or infused, but some may be taken by mouth
- Unique storage or shipment requirements
- Additional education and support required from a health care professional
- Usually not stocked at retail pharmacies

This list is subject to change without notice. Generics are shown in lower case.

*Triessent is a specialty pharmacy program offered by Prime Therapeutics LLC, a pharmacy benefit management company which also maintains its own mail order pharmacy. Blue Cross and Blue Shield of Texas contracts with Prime Therapeutics to provide pharmacy benefit management and mail order pharmacy services and to administer this specialty pharmacy program. The Triessent program uses one or more contracting specialty pharmacies to fill prescriptions and provide certain program services. Blue Cross and Blue Shield of Texas, as well as several other independent Blue Cross and Blue Shield Plans, has an ownership interest in Prime Therapeutics LLC.
