

# Inovalon Value-Based Program Insights Reporting

## What is Value-Based Program Insights?

Value-Based Program Insights (VBPI) can help identify gaps in our members' care. This Inovalon data tool analyzes how providers perform against value-based contract targets for Commercial, Medicaid and Medicare Advantage program Star Ratings.

VBPI has data on Healthcare Effectiveness Data and Information Set (HEDIS®) quality measures. This data can help identify programs or measures to target.

You can filter reports by key variables and drill down to the patient level. For further analysis and outreach, you can export reports.

### Inovalon VBPI Overview Training Sessions

Sessions cover how to navigate the VBPI dashboards and how to customize the member details report to your reporting needs. We'll review how to export the program overview and the patient details to identify open care gaps.
